

## Copyright in Works of Architecture

This report by the Register of Copyrights reviews the history of architecture as an art form, the practices on ownership of rights in the architectural profession, case law in the United States on protection for works of architecture and works relative to the architecture, the legislative history in the United States on protection for works of architecture, protection for works of architecture under the Berne Convention and under the laws of Berne member countries, and, finally, analyzes the arguments favoring and opposing protection for works of architecture under our copyright laws, as well as for increased copyright protection for architectural plans and specifications.
